

Do you have Medicaid?

***Do you get mental health
services and prescriptions?***

Then this *important* card is for you.

- 1.** **Read** this card to learn about Medicaid health plans — the new way to get your health services in Medicaid.
- 2.** **Talk** to your doctor or case manager about services and prescriptions important to you.
- 3.** **Choose a health plan for getting your Medicaid services.** *You must choose.* Call South Carolina Healthy Connections Choices. Tell us you get mental health services and want to choose the health plan that has the best services for you:
 - your doctors
 - your prescriptions
 - plus extra services

more ➔

Choose the health plan that's best for you.

Don't worry. You will not lose any of your Medicaid benefits.

A health care team: In a health plan, you will have one doctor who takes care of you and knows your medical needs. The doctor can work closely with your case manager or mental health clinic to make sure you get the care, guidance and medications you need.

Extra services: Many health plans offer extra services such as dental care, vision care, or a nurse on call 24 hours a day to answer your health questions.
